Why complement air conditioning with solar?

Western Australia is the perfect place for solar power and there are many benefits of 'going solar'. A solar photovoltaic (PV) system consists of two main elements – a set of solar panels, which convert sunlight into electricity, and an inverter to take that electricity and feed it into your home via a switchboard.

Save on your power bills

Use power generated from your solar panels and watch your energy bills go down. With a battery added to your system, you can even store surplus power for use 24/7. By connecting your Ford & Doonan solar system to the electricity grid, you can sell your unused energy back to Synergy for passive income. Depending on your system and usage, you will see your initial investment paid off after only a few years.

Good for the environment

The environmental benefit of Ford & Doonan solar electricity is clear. Sunshine is a clean energy source that will never run out and does not rely on fossil fuels like coal and gas. With Ford & Doonan you can power your home while contributing to a brighter, more sustainable future.

Low maintenance

Ford & Doonan solar PV systems are low maintenance. Just like the kitchen window, all our solar panels require is a good clean from time to time. With proper care, they can be expected to last 25 years. That's a Ford & Doonan guarantee.

Government subsidies

The Australian Government offers financial incentives for eligible Ford & Doonan solar PV systems through the Small-scale Renewable Energy Scheme, saving you money. You can even leave the paperwork to us!

Add value to your property

Plan on selling or renting out your home? Ford & Doonan solar PV systems are highly desirable assets that add value to your property.

Simple Installation

We have electricians and installers at the ready. You can leave the installation of your Ford & Doonan solar PV system and air conditioner to our team, meaning less mucking around and reduced costs.

Why Ford & Doonan Solar?

For over 35 years Ford & Doonan have kept West Australians cool in Summer and warm in Winter. As a trusted brand, you can rely on Ford & Doonan to not only install your system, but to provide you with lasting support as a valued client. Ford & Doonan brand stands for quality work, reliable products, and peace of mind. You can count on Ford & Doonan.
